January 28, 2008

Dear ECT customers:

For 18 years, ECT International has been proud to be your partner, meeting your needs for advanced, market-leading software tools that streamline the electrical design process. We have backed these tools with world-class service, training and support. Our objective has always been to succeed through your success. Customers who achieve greater productivity and efficiency, we believe, will be repeat customers. We appreciate not only your business but also the valuable feedback you have provided that has allowed us to steadily improve our products.

And now, we are extremely proud that another great company is joining our partnership. It gives us great pleasure to announce that Bentley Systems, Incorporated has acquired the global business of ECT International. Bentley Systems is one of the largest and most widely respected vendors of products and solutions used to design and manage the world's infrastructure, and we at ECT are very excited to be a part of the Bentley global organization. Bentley Systems is well known for their popular software products such as MicroStation, ProjectWise, AutoPlant, STAAD, Haestad, and many others.

The ECT team you have come to know are now supported by over 2500 colleagues working in every major country around the world, but we will still be working on **promis•e**, and we will still be working with you to meet your electrical solution needs.

Like ECT, Bentley is committed to the success of their users, and has always provided high-value, innovative support and subscription programs such as the SELECT and Enterprise License Subscription programs. With **promis•e** now in Bentley's comprehensive portfolio, new and expanded possibilities emerge for productivity gains. We will continue to supply our market-leading electrical design tools, but we will also be working on better integration with a wider design and production environment. I'm sure we will see rapid innovation on all of our strategic product initiatives.

Please continue to contact us with your questions, comments and product requirements. More information on Bentley can be found at www.Bentley.com. We will provide additional information on this exciting transition in the weeks ahead.

Sincerely,

A handwritten signature in black ink, appearing to read "Arthur Sawall".
